This product is an unsecured debt instrument governed by English law.

The product has a fixed maturity term investment and provides you with an exposure to the creditworthiness of the 75 Reference Entities of the Reference Index. The objective of the product is to generate a periodic return and payback your invested capital at maturity, provided that Credit Events affecting Reference Entities generate a Cumulative Loss Amount of less than the Attachment Point . Your capital will be fully at risk when investing in this product.

Coupon:

On each Coupon Payment Date, we observe the occurrence of Credit Events affecting the Reference Entities since the First Credit Event Occurrence Date:

If the Cumulative Loss Amount generated by the potential Credit Event(s) affecting the Reference Entities is at or below the Attachment Point, you will receive the Coupon, pro rata based on the Day Count Fraction.

If the Cumulative Loss Amount generated by the potential Credit Event(s) affecting the Reference Entities is above the Attachment Point and below the Detachment Point, the coupon amount you receive relating to the current payment date will be reduced by the difference between the Cumulative Loss Amount and the Attachment Point, divided by the Thickness.

Otherwise, if the Cumulative Loss Amount generated by the potential Credit Event(s) is at or above the Detachment Point no coupon will be paid on the next Coupon Payment Date and any future Coupon Payment Dates.

Final Redemption:

On the Maturity Date, we observe the occurrence of Credit Events affecting the Reference Entities since the First Credit Event Occurrence Date:

If the Cumulative Loss Amount generated by the potential Credit Event(s) affecting the Reference Entities is at or below the Attachment Point, you will receive 100% of the Nominal Value.

If the Cumulative Loss Amount generated by the potential Credit Event(s) affecting the Reference Entities is above the Attachment Point and below the Detachment Point, you will receive 100% of the Nominal Value minus the difference between the Cumulative Loss Amount and the Attachment Point, divided by the Thickness.

Otherwise, if the Cumulative Loss Amount generated by the potential Credit Event(s) is at or above the Detachment Point, you will sustain a complete loss on your initial investment.

Additional Information :

A Credit Event occurs when an entity becomes insolvent, defaults on its payment obligations, experiences a restructuring of its debt obligations in a manner that is detrimental to creditors, or is subject to governmental intervention (where applicable). The term "Credit Event" is defined in the 2014 ISDA Credit Derivatives Definitions, as published by the International Swaps and Derivatives Association, Inc. ("ISDA") (www.isda.org).

Every time a Reference Entity in the Reference Index experiences a Credit Event since the First Credit Event Occurrence Date, the Loss Amount is defined as the weight of this entity in the Reference Index at the default date multiplied by 100% of the Nominal Value.

The Cumulative Loss Amount is the sum of the Loss Amount for every Entity that experienced a Credit Event since the First Credit Event Occurrence Date.

A Succession Event could result in an entity having a higher weighting. For example, if two entities within the Reference Index merge, this new entity will have the combined weight of both former entities. If a Credit Event occurs on an entity with a higher weight, the number of credit events required to impact the partial/total loss of your capital and / or coupon loss will be reduced.

The Recovery Rate refers to the value of a security following a Credit Event affecting the issuer and / or its guarantor. More precisely it is the amount of principal and interest on a debt instrument that can be recovered following a Credit Event, expressed as a percentage of its face value. For this product, the Recovery Rate will be fixed at 0% for each entity and is not determined by the process outlined by the International Swaps and Derivatives Association (ISDA) Committee, and as such may differ.

The Reference Index provides credit exposure to entities that are rated as "High Yield". Consequently, these entities have a higher probability of experiencing a Credit Event compared to those that are "Investment Grade". If several Credit Events occur during the life of the product, the market value of the product will decrease faster and its sensitivity to market fluctuations will be higher.

All coupons are expressed as a percentage of the Nominal Value.

Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment.

The product is available through public offer and for the offer period defined in the following Jurisdiction: Sweden.

Key risks that are specific to the guarantor :

Due to Société Générale's role as guarantor and counterparty to the Issuer's hedging transactions, investors are essentially exposed to Société Générale's credit risk and have no recourse against the Issuer in the event of the Issuer's default.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE SECURITIES?

The investor bears the risk of total or partial loss of the amount invested at redemption of the Notes on the Maturity Date or the event the Notes is sold by the investor before that date.

Certain exceptional circumstances may have a negative effect on the liquidity of the product. The investor may not be able to sell the product easily or may have to sell it at a price that results in a total or partial loss of the amount invested.

The market value of the Notes depends on the evolution of market parameters at the time of exit (price level of the Underlying(s), interest rates, volatility and credit spreads) and may therefore result in a risk of total or partial loss on the amount initially invested.

Events unrelated to the Underlying(s) (e.g. change in law, including tax law, force majeure, number of securities in circulation) may lead to early redemption of the Notes and thus to total or partial loss of the amount invested.

Events affecting the Underlying(s) or hedging transactions may lead to adjustments, de-indexation, substitution of the Underlying(s), or early redemption of the Notes and consequently to losses on the amount invested, including in the case of capital protection.

If the currency of the investor's main activities is different from that of the product, the investor is exposed to currency risk, especially in the event of exchange controls, which may reduce the amount invested.

From a date that may be before their investment decision, Noteholders are exposed to events related to the creditworthiness of the reference entities. Upon the occurrence of such events, the redemption amount or the value of the assets received at maturity of the Notes will be determined by reference to the debt value of such reference entities and may be (i) less than the invested amount and (ii) as the case may be, with no interest accruing from or before the date of occurrence of such events.

Redemption of the Credit Linked Notes or as the case may be, notice that no amount is due under these Notes, may occur several months after the occurrence of the credit event, including several months after the Scheduled Maturity Date of the Notes.

Investment in the Notes creates a leverage effect on the credit risk exposure of the Reference Entities compared to a direct investment in the bonds of the Reference Entities. When the trigger threshold for a credit event is reached, the closer the detachment point is and the faster the detachment point is positioned high in the tranche, the stronger Final Redemption Amount is impacted.

When the Fixed Recovery is set at zero, the investment in the Notes creates a leverage effect on the credit risk exposure of the Reference Entities compared to a direct investment in the bonds of the Reference Entities

Den här produkten är ett icke-säkerställt skuldinstrument under Engelsk lag.

Produkten har en investering med fast löptid och erbjuder dig en exponering mot kreditvärdigheten hos de 75 Referensenheter i Referensindexet. Syftet med produkten är att generera en periodisk avkastning och att återbetala ditt investerade kapital vid förfall, förutsatt att Kredithändelser som påverkar Referensenheter genererar ett Kumulativt Förlustbelopp som är mindre än Fästpunkten. Hela ditt kapital riskeras vid investering i denna produkt.

Kupong:

På varje Kupongbetalningsdag, observerar vi förekomsten av Kredithändelser som påverkar Referensenheter sedan den Initiala Observationsdagen:

Om det Kumulativa Förlustbeloppet som genererats av de(n) potentiella Kredithändelsen(rna) som påverkar Referensenheter är lika med eller under Fästpunkten, kommer du att få Kupongen, pro rata baserat på Ränteberäkningsfraktionen.

Om det Kumulativa Förlustbeloppet som genererats av de(n) potentiella Kredithändelsen(rna) som påverkar Referensenheter är högre än Fästpunkten och under Avskiljningspunkten, kommer kupongen som du kommer att få och som är relaterad till den aktuella betalningsdagen att reduceras med differensen mellan det Kumulativa Förlustbeloppet och Fästpunkten, delat med Tjockleken.

I annat fall, om det Kumulativa Förlustbeloppet som genererats av de(n) potentiella Kredithändelsen(rna) är lika med eller över Avskiljningspunkten kommer ingen kupong att betalas på den nästkommande Kupongbetalningsdagen eller på några framtida Kupongbetalningsdagar.

Slutlig Inlösen:

På Förfalldagen, observerar vi förekomsten av Kredithändelser som påverkar Referensenheter sedan den Initiala Observationsdagen:

Om det Kumulativa Förlustbeloppet som genererats av de(n) potentiella Kredithändelsen(rna) som påverkar Referensenheter är lika med eller under Fästpunkten, kommer du att få 100% av det Nominella Värdet.

Om det Kumulativa Förlustbeloppet som genererats av de(n) potentiella Kredithändelsen(rna) som påverkar Referensenhetererna är högre än Fästpunkten och under Avskiljningspunkten, kommer du att få 100 % av det Nominella Värdet reducerat med differensen mellan det Kumulativa Förlustbeloppet och Fästpunkten, delat med Tjockleken.

I annat fall, om det Kumulativa Förlustbeloppet som genererats av de(n) potentiella Kredithändelsen(rna) är lika med eller över Avskiljningspunkten, kommer du att erfara en total förlust av din initiala investering.

Övrigt Information:

- En kredithändelse inträffar när en enhet blir insolvent, fallerar avseende dess betalningsskyldigheter, erfara en rekonstruktion av dess skuldförbindelser på ett sätt som är negativt för fordringsägarna, eller blir föremål för statliga ingripanden (om tillämpligt). Begreppet "Kredithändelse" definieras i the 2014 ISDA Credit Derivatives Definitions, som publicerats av the International Swaps and Derivatives Association, Inc. ("ISDA") (www.isda.org).

- Varje gång en Referensenheter i Referensindexet upplever en Kredithändelse sedan den Initiala Observationsdagen, definieras Förlustbeloppet som viktningen av denna enhet i Referensindexet vid händelsedagen multiplicerat med 100% av det Nominella Värdet.

- Det Kumulativa Förlustbeloppet är summan av Förlustbelopp för varje Enhet som har upplevt en Kredithändelse sedan den Initiala Observationsdagen.

- En Efterträdelshändelse kan resultera i att en enhet får en högre viktning. Till exempel, om två enheter inom Referensindexet går samman, kommer den nya enheter att ha den sammanlagda vikten av de bägge tidigare enhetererna. Om en Kredithändelse inträffar på en enhet med en högre vikt, kommer antalet av kredithändelser som krävs för att påverka den partiella eller totala förlusten av ditt kapital och/ eller kupong att reduceras.

- Återvinningskursen refererar till värdet på ett värdepapper efter ett fallissemang. Mer precist är det beloppet av kapital och ränta på ett fallerat skuldinstrument som kan återvinnas, uttryckt som ett procenttal av dess nominella värde. För denna produkt kommer Återvinningskursen att vara fixerad till 0% för varje enhet som fallerat och fastställs inte genom den process som beskrivs av International Swaps and Derivatives Association (ISDA) Committee (www.isda.org).

- Referensindexet erbjuder en kreditexponering mot enheter som kategoriserats som "High Yield". Som en konsekvens av detta, har dessa enheter en större sannolikhet att erfara en Kredithändelse jämfört med de som är "Investment Grade".

- Samtliga kuponger är uttryckta som ett procenttal av det Nominella Värdet.

- Extraordinära händelser kan leda till ändringar i villkoren för produkten eller för förtida avslutande av produkten och kan resultera i förluster i din investering.

Vilka nyckelrisker är specifika för Garanten?

På grund av Société Générale's roll som garant och motpart till Emittentens hedgetransaktioner, är investerare väsentligen exponerade mot Société Générale's kreditrisk och har inget krav gentemot Emittenten i händelse av Emittentens fallissemang.

VILKA NYCKELRISKER ÄR SPECIFIKA FÖR VÄRDEPAPPEREN?

Investeraren bär risken för total eller partiell förlust av det belopp som investerats vid inlösen av Obligationerna på förfallodagen eller i händelse av att Obligationerna säljs av investeraren före det datumet.

Produktens likviditet kan påverkas negativt av vissa exceptionella omständigheter. Investerare kanske inte enkelt kan sälja produkten eller måste sälja den till en kurs som resulterar i hel eller delvis förlust av det investerade beloppet.

Marknadsvärdet för Obligationerna beror på utvecklingen av marknadsparametrar vid tidpunkten för avslut (kursnivån på de(n) Underliggande, räntesatser, volatilitet och kredit-spreadar) och kan därför resultera i en risk för en total eller delvis förlust av det initialt investerade beloppet.

Händelser orelaterade till den Underliggande (t.ex. lagändringar, inklusive skatterättslig reglering, force majeure, antal värdepapper i cirkulation) kan leda till förtida inlösen av Obligationerna och därmed till en hel eller delvis förlust av det investerade beloppet.

Händelser som påverkar de(n) Underliggande eller hedningstransaktioner kan leda till justeringar, de-indexering, utbyte av de(n) Underliggande, eller förtida inlösen för Obligationerna och som följd till förlust av investerade belopp, inklusive i händelse av kapitalskydd.

Om valutan för investerarens huvudsakliga aktiviteter skiljer sig från produktens valuta, är investeraren exponerad för valutarisk, särskilt i händelse av valutakontroller, vilket kan minska det investerade beloppet.

Obligationsinnehavare kommer, från en dag som kan inträffa innan deras investeringsbeslut, vara exponerade mot händelser som är relaterade till kreditvärdigheten för referensenheter. Vid inträffandet av sådana händelser, kommer inlösenbeloppet eller värdet på tillgångarna som erhålls vid Obligationernas förfallodag fastställas genom referens till skuldvärdet för sådana referensenheter och kan vara (i) mindre än det investerade beloppet och (ii) som fallet kan vara, utan ränta som löper från eller före dagen för inträffande av sådana händelser.

Inlösen av Kreditrelaterade Obligationer eller som fallet kan vara, kan meddelande om att inga beloppet förfaller under dessa obligationer inträffa flera månader efter inträffandet av en kredithändelse, inkluderat flera månader efter den Planerade Förfallodagen för Obligationerna.

Investeringen i Obligationerna skapar en hävstångseffekt på Referensenheterens kreditriskexponering jämfört med en direkt investering i Referensenheterens obligationer. När den aktiverande tröskeln för en kredithändelse nås, desto närmare avskiljningspunkten är och ju snabbare avskiljningspunkten är positionerad högt i tranchen, desto starkare påverkas det slutliga inlösenbeloppet.

När den Fasta Återhämtningen är satt till noll skapar investeringen i Obligationerna en hävstångseffekt på Referensenheterens kreditriskexponering jämfört med en direkt investering i Referensenheterens obligationer
