Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
5. Adverse economic and financial conditions have in the past and may in the future significantly affect on the BNP Paribas Group and the markets in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the Securities (payout):

The return on the Securities depends on the performance of the Underlying Reference and whether knock-in or knock-out features apply. Investors may be exposed to a partial or total loss of their investment.

2. Risks related to the underlying and its disruption and adjustments:

The value of underlying fund shares or units or the level of an underlying fund index in respect of Fund Securities will be affected by the investment strategy of the relevant fund. The investment strategy is often opaque and may not be publicly available. In addition, funds are often illiquid and/or unregulated. If the investment strategy does not perform as expected, there are limited methods by which direct investments in fund shares or units can be exited. The value of the fund shares or units or the level of a fund index is also exposed to the performance of various fund service providers, in particular, the investment adviser. Taking these circumstances into account, compared to other types of investment, there is a greater risk associated with an investment in Fund Securities that the value of the Securities may be adversely affected (and could fall to zero) and the return may be less (and could be significantly less) than expected. Exposure to a fund share, similar risks to a direct fund investment, extraordinary fund events may have an adverse effect on the value or liquidity of the Securities.

3. Risks related to the trading markets of the Securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference, the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference and the correlation risk of the Underlying Reference. The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Vilka är de centrala riskerna som är specifika för värdepapperna?

Mest väsentliga riskfaktorer som är specifika för värdepappren

Det finns också risker associerade med Värdepappren, inklusive:

- Risker relaterade till struktureringen av Värdepappren (utbetalning):

Avkastningen på Värdepapperen beror på utvecklingen av den Underliggande Referensen och huruvida barriärfunktioner (knock-in eller knock-out) tillämpas. Investerare kan exponeras för en partiell eller total förlust av deras investering.

2. Risker relaterade till den underliggande and dess avbrytande och justering:

Värdet av underliggande fondaktier eller andelar eller nivån av ett underliggande fondindex avseende Fond-Värdepapperen kommer att påverkas av investeringsstrategin avseende den relevanta fonden. Investeringsstrategin är ofta oklar och är inte alltid tillgänglig för allmänheten. Dessutom är fonder ofta illikvida och/eller icke reglerade. Om investeringsstrategin inte presterar som förväntat, finns det begränsade metoder för att komma ifrån direkta investeringar i fondaktier eller andelar. Värdet av fondaktierna eller andelarna eller nivån av fondindex är också exponerade för hur olika leverantörer av fondtjänster, särskilt investeringsrådgivaren, presterar. Med beaktande av dessa omständigheter, och i jämförelse med andra typer av instrument, så finns det en stor risk förknippad med en investering i Fond-Värdepapper att värdet av Värdepapperen kan påverkas negativt (och kan falla till noll) och att avkastningen kan vara mindre (och kan vara väsentligen mindre) än förväntat. Exponering för en fondaktie, liknande risker till en direkt fondinvestering, extraordinära fondhändelser kan ha en negativ effekt på värdet eller likviditeten av Värdepapperen.

3. Risker relaterade till handelsplatsen av Värdepapperen:

Priset för Värdepapperen kan påverkas av ett antal faktorer, inklusive, men inte begränsat till, det relevanta priset, värdet eller nivå av den Underliggande Referensen, tiden som kvarstår till dess att den schemalagda inlösendagen sker av Värdepapperen, den faktiska eller implicita volatiliteten associerad med den Underliggande Referensen och korrelations-risken av den Underliggande Referensen. Sannolikheten att värdet och priset för Värdepapperen kommer fluktuerar (antingen positivt eller negativt) beror på ett flertal faktorer, vilka investerare bör överväga noga innan de köper eller säljer Värdepapper.

4. Legala risker:

Villkoren för Värdepapperen innehåller bestämmelser för kallande till möten med innehavare av sådana Värdepapper rörande frågor som påverkar deras intressen i allmänhet. Dessa bestämmelser tillåter definierade majoriteter att binda alla innehavare, inklusive innehavare som inte deltog eller röstade vid det relevanta mötet och innehavare som röstade annorlunda än majoriteten.

Mest väsentliga intressekonflikterna rörande erbjudandet eller upptagandet till handel

Förvaltaren och dess dotterbolag kan också ha varit verksamma, och kan även i framtiden bli verksamma vad gäller investeringar och börshandel och kan utföra andra tjänster för Emittenten och Garanten och deras respektive dotterbolag.

Olika företag inom BNPP-koncernen (inklusive Emittenten och Garanten) och Dotterbolag åtar sig olika roller i samband med Värdepapperna, inklusive Värdepappernas Emittent och Värdepappernas Beräkningsombud och kan även utföra handelsrelaterade verksamheter (inklusive risksäkringsverksamhet) som hänför sig till Underliggande och andra instrument eller derivatprodukter baseras på eller som är relaterade till de Underliggande.
