"**Basket<sub>t</sub>**" means the Basket Value on Observation Date<sub>t</sub> as determined in accordance with this paragraph 2.1.

The "**Basket Value**" is calculated as follows:

- the Basket Value on the Strike Date ("**Basket<sub>0</sub>**") is equal to 100; and
- the Basket Value on each Observation Date<sub>t</sub> thereafter ("**Basket<sub>t</sub>**"), shall be determined recursively by the Calculation Agent in accordance with the following formula:

$$Basket_t = Basket_{t-1} \times \left( \frac{PTF_t - Fees_t}{PTF_{t-1}} \right)$$

Where:

"**t**" means an Observation Date;

"**t - 1**" means immediately preceding Observation Date;

"**PTF<sub>t</sub>**" means the Portfolio Level on each Observation Date<sub>t</sub> as determined in accordance with paragraph 2.2 of this Part C (*Provisions for Calculating the Portfolio Level*); and

"**Fees<sub>t</sub>**" means the Fees Level on each Observation Date<sub>t</sub> as determined in accordance with paragraph 2.3 of this Part C (*Provisions for Calculating the Fees*).

### 2.2. Provisions for Calculating the Portfolio Level

The Portfolio Level represents the exposure to the Basket Components without any fees deducted.

The "**Portfolio Level**" is calculated as follows:

- the Portfolio Level on the Strike Date ("**PTF<sub>0</sub>**") is equal to 100; and
- the Portfolio Level on each Observation Date<sub>t</sub> thereafter ("**PTF<sub>t</sub>**"), shall be determined recursively by the Calculation Agent in accordance with the following formula:

$$PTF_t = \sum_{i=1}^{N+M} n_i(t-1) \times UDL_{i,t} \times FX_{i,t} + Cash_t + CustomIndex_t$$

Where:

"**n<sub>i</sub>(t)**" is the quantity of Basket Component<sub>i</sub> in PTF(t) determined by the Calculation Agent in accordance with the following formula:

(a) If "t" is an Observation Date, in respect of Basket Component;

$$n_i(t) = n_{target,i}(t_k)$$

(b) Otherwise:

$$n_i(t) = n_i(t - 1)$$

Where:

" $n_{target,i}(t_k)$ " is the target quantity of Basket Component<sub>i</sub> determined by the Calculation Agent on Rebalancing Date  $t_k$ :

$$n_{target,i}(t_k) = w_{i,t_k} \times \frac{PTF_{t_v}}{UDL_{i,t_v} \times FX_{i,t_v}}$$

" $t_k$ " is the Rebalancing Date immediately preceding Observation Date<sub>t</sub>, which corresponds to:

- (i) the date of the latest Recommendation, if the Recommendation was sent by the Basket Investment Advisor before the applicable Recommendation Cut-off Time; or
- (ii) the Observation Date immediately following the date of the latest Recommendation otherwise;

The Strike Date shall be deemed to be the first Rebalancing Date (" $t_0$ ");

" $t_v$ " is the Recommendation value date, corresponding to the latest Observation Date on which a Basket Value is available at the moment of the Recommendation from the Basket Investment Advisor;

" $w_{i,t_k}$ " means the Weighting of each Basket Component<sub>i</sub> on Rebalancing Date<sub>t<sub>k</sub></sub>, following any Recommendation by the Basket Investment Advisor;

" $UDL_{i,t}$ " means the Composite Total Return Spot of the Basket Component<sub>i</sub> on Observation Date<sub>t</sub>, as determined in accordance with paragraph 2.6 of this Part C (*Provision for Calculating the Composite Total Return Spot*);

" $Cash_t$ " means the Cash Component Level on Observation Date<sub>t</sub>, as determined in accordance with paragraph 2.5 of this Part C (*Provision for calculating the Cash Component Level*); and

" $CustomIndex_t$ " means the level of the Custom Index on Observation Date<sub>t</sub>, as determined in accordance with paragraph 2.4 of this Part C (*Provisions for calculating the Custom Index Level*);

### 2.3. Provisions for calculating the Fees

The Fees Level in respect of any Observation Date<sub>t</sub> is the sum of the Rebalancing Fee, Replication Fee (if applicable) and Leverage Fee (if applicable).

The "**Fees Level**" on each Observation Date<sub>t</sub> (" $Fees_t$ ") shall be determined by the Calculation Agent in accordance with the following formulas:

" $RBF(t)$ " is the applicable rebalancing fee ("**Rebalancing Fee**") and calculated as follows:

$$RBF(t + 1) = \sum_{i=1}^{N+M} RBF_i \times UDL_{i,t} \times FX_{i,t} \times |n_i(t) - n_i(t - 1)|$$

" $RF(t)$ " is the applicable replication fee (the "**Replication Fee**") determined in respect of Basket Components in respect of which "Type of Underlying Reference" is "Custom Index" and calculated as follows:

$$RF(t + 1) = \sum_{i=1}^{N+M} RF_i \times FX_{i,t} \times UDL_{i,t} \times |n_i(t)| \times \frac{ACT(t - 1, t)}{360}$$

"**LF(t)**"

is the leverage fee which will be applied only if the sum of the Weightings of Basket Components that are not a Basket Component in respect of which "Type of Underlying Reference" is "Custom Index" is above 100% at the latest Rebalancing Date  $t_k$  and is calculated in accordance with the following formula:

$$LF(t + 1) = 0.50\% \times \max\left(0, \left(\sum_{i=1}^N w_{i,t_k}\right) - 100\%\right) \times PTF_{t_k} \times \frac{ACT(t - 1, t)}{360}$$

#### 2.4. Provisions for Calculating the Custom Index Level

The Custom Index Level represents the performance of the Basket Components in respect of which "Type of Underlying Reference" is "Custom Index", if applicable.

The Custom Index Level on each Observation Date, ("**Custom Index<sub>t</sub>**") shall be determined by the Calculation Agent in accordance with the following formula:

$$CustomIndex_t = \sum_{i=N+1}^{N+M} n_i(t-1) \times FX_{i,t} \times (UDL_{i,t} - UDL_{i,t-1})$$

Where:

"**FX<sub>i,t</sub>**"

means the exchange rate on the relevant Observation Date, determined by the Calculation Agent by reference to the WM Company (or any successor website or page thereto, as determined by the Calculation Agent) at approximately 16.00 London time between the Basket Component Currency for such Basket Component<sub>i</sub> and the Settlement Currency, provided that, if

such source is not available, such rate of exchange may be determined by the Calculation Agent by reference to such sources as it considers to be appropriate acting in good faith and in a commercially reasonable manner, having taken into account relevant market practice.

## 2.5. Provisions for calculating the Cash Level

The Cash Level represents the performance of the cash capitalised in the Portfolio Level that is used if the exposure of the Hybrid Basket to Basket Components within the Hybrid Basket that are not Basket Components in respect of which "Type of Underlying Reference" is "Custom Index" is different from 100%.

The "**Cash Level**" on each Observation Date<sub>t</sub> ("**Cash<sub>t</sub>**") shall be determined by the Calculation Agent in accordance with the following formula:

$$Cash_t = n_{cash}(t - 1) \times MM_t$$

Where:

"**n<sub>cash</sub>(t)**" is the quantity of the cash component in PTF(t), determined by the Calculation Agent in accordance with the following formula:

$$n_{cash}(t) = \frac{PTF_t - \sum_{i=1}^N n_i(t) \times UDL_{i,t} \times FX_{i,t}}{MM_t}$$

"**MM<sub>t</sub>**" is the Cash Component Level on Observation Date<sub>t</sub>, determined by the Calculation Agent in accordance with the following formula:

- If Observation Date<sub>t</sub> is a Stockholm Business Day:

$$MM_t = MM_{t-1} \times \left[ 1 + ON_{t-1} \times \frac{Act(t-1,t)}{360} \right]$$

- or if Observation Date<sub>t</sub> is not a Stockholm Business Day:

$$MM_t = MM_{t-1}$$

"**MM<sub>0</sub>**" is the Cash Component Level on the Strike Date and is equal to 100;

"**ON<sub>t</sub>**" in respect of a Stockholm Business Day, the day-to-day fixing (known as the Tomorrow/Next (or T/N fixing)) of the Stockholm Interbank Offered Rate (known as STIBOR) administered by Swedish Financial Benchmark Facility AB (or any successor administrator) as published on the Bloomberg Screen BTMM SW Page as of approximately 11.00 am (Stockholm time) on such Stockholm Business Day (the "**Original STIBOR Rate**") provided that, if (i) the relevant rate does not appear on such page at such time, (ii) there has been a permanent or indefinite cancellation of the relevant rate, (iii) the relevant rate ceases to exist or ceases to be published permanently or indefinitely or (iv) it is unlawful or impracticable for the Calculation Agent to make any calculations or determinations using the relevant rate, the Calculation Agent may determine the relevant rate for such Stockholm Business Day acting in good faith and in a commercially reasonable manner at such time as it may select. In determining the relevant rate, the Calculation Agent may have regard to any sources(s) it considers appropriate, including, but not limited to:

- (a) any alternative rate selected by the central bank, reserve bank, monetary authority or any similar institution (including any committee or working group thereof) in the jurisdiction or region of the currency in which the relevant rate is denominated (each a "**Relevant Nominating Body**"), that is consistent with industry accepted standards, provided that, if two or more alternative rates are selected by any Relevant Nominating Body, the Issuer or the Calculation Agent, as applicable, shall determine which of those rates is most appropriate to preserve the economic features of the relevant Securities;

- (b) any alternative rate that has replaced the Original STIBOR Rate in customary market usage in the international debt capital markets for the purposes of determining floating rates of interest on the same basis as the Original STIBOR Rate; or
- (c) such other rate as the **Calculation Agent** determines is most comparable to the Original STIBOR Rate.

The Calculation Agent will apply such adjustments that are formally recommended by any Relevant Nominating Body or, if none, may determine any adjustments that are in customary market usage in the international debt capital markets needed to make the replacement rate comparable to the Original STIBOR Rate, acting in good faith and in a commercially reasonable manner.

The determination of a replacement rate and any applicable adjustments will (in the absence of manifest error) be final and binding, unless the Calculation Agent subsequently determines in respect of a Stockholm Business Day that such rate is no longer comparable to the Original STIBOR Rate or no longer constitutes an industry accepted successor rate, in which case, a new replacement rate shall be determined in accordance with paragraph (a), (b) or (c) above for each subsequent Stockholm Business Day. If the Calculation Agent is unable to or otherwise does not determine a further replacement rate, then the rate will remain unchanged.

As used above, "**Stockholm Business Day**" means a day on which commercial banks and foreign exchange markets are open for general business (including settling payments and dealings in foreign exchange and foreign currency deposits) in Stockholm

## 2.6. Provision for Calculating the Composite Total Return Spot

The "**Composite Total Return Spot**" is calculated as follows:

The Composite Total Return Spot of Basket Component<sub>*i*</sub> on each Observation Date<sub>*t*</sub> ("**UDL<sub>*i,t*</sub>**") shall be determined by the Calculation Agent in accordance with the following formulae:

- (i) If Basket Component<sub>*i*</sub> is a Basket Component in respect of which "Type of Underlying Reference" is "Custom Index":

- If Observation Date<sub>*t*</sub> is a Scheduled Custom Index Business Day for Basket Component<sub>*i*</sub>:

$$UDL_{i,t} = S_{i,t}$$

- Otherwise:

$$UDL_{i,t} = UDL_{i,t-1}$$

- (ii) If Basket Component<sub>*i*</sub> is a Basket Component in respect of which "Type of Underlying Reference" is "Share" or "ETI":

- If Observation Date<sub>*t*</sub> is a Scheduled Trading Day for Basket Component<sub>*i*</sub>:

3.1.4. Each Recommendation shall include, in respect of any Custom Index, Share or ETI which is proposed to be added as a Basket Component to the Hybrid Basket, any information necessary to complete the items in paragraphs 25, 26 and/or 27, as applicable of Part A of these Final Terms which are stated to be completed by the information included in a Recommendation.

Such lack of liquidity with respect to a Basket Component (or an underlying asset of a Basket Component, where applicable) could be evidenced, for instance, by the absence of pricing quotations for such Basket Component (or an underlying asset of such Basket Component, where applicable) on or around the relevant day.

## 5. Fees

The following fees are calculated in respect of the Hybrid Basket:

### 5.1.1. Advisory Fee

The Basket Investment Advisor will receive a fee of 1% per annum. of the Strategy Value paid *pro rata temporis* on a quarterly basis pursuant to the Basket Investment Advisory Agreement (the "**Advisory Fee**"). The Advisory Fees are deducted by the Calculation Agent from the Basket Value on a daily basis. Holders are therefore indirectly paying these Advisory Fees Accordingly, the performance of the Strategy is lower than the performance of the sum of the performance of the Basket Components. These Advisory Fees are received by the Basket Investment Advisor for the advisory service it provides in relation to the Certificates.

### 5.1.2. Leverage Fee

The Leverage Fees are calculated in accordance with paragraph 2.3 and are deducted from the Basket Value. Holders are therefore indirectly paying these Leverage Fees. These Leverage Fees are reflect the cost to the Calculation Agent for providing leverage for the purposes of determining the return on the Certificates.

### 5.1.3. Structuring Fee

A structuring fee will be determined by the Calculation Agent (the "**Structuring Fees**") which will be equal to 0.3% per annum multiplied by the Strategy Value multiplied by the number of days in the relevant Fee Period and divided by 360 (the number of days to be calculated on an Act/360, adjusted basis) payable on each Fee Payment Date to and including the Redemption Date).

As used in this paragraph 5.1.3:

"**Fee Payment Date**" means 31 March, 30 June, 30 September and 31 December in each year from, and including 31 March 2022 and the Redemption Date.

"**Fee Period**" means the period from, and including, each Fee Payment Date or the Issue Date in respect of the first Fee Period to but excluding, the next Fee Payment Date provided that the last Fee Period will expire on (but exclude) the Redemption Date.

Holders are indirectly paying these Structuring Fees. Accordingly, the value of the Strategy is lower than the performance of the sum of the performances of the Basket Components. These Structuring Fees reflect the structuring services provided by BNP Paribas Arbitrage S.N.C. in relation to the Certificates.

#### 5.1.4. Rebalancing Fee

The Basket Value will be adjusted by a Rebalancing Fee, as determined in accordance with paragraph 2.3 and 2.3.1 of this Part C (*Rebalancing Fee*), which will be calculated for each Rebalancing.

#### 5.1.5. Replication Fee

The Basket Value will be adjusted by a Replication Fee, as determined in accordance with paragraph 2.3 and 2.3.2 of this Part C (*Replication Fee*) where there is any Basket Component, in respect of which "Type of Underlying Reference" is "Custom Index" to enable the replication of the Custom Index by the Calculation Agent. ## 6. Additional Risk Factors

Certain considerations associated with Securities linked to Shares traded on the China Connect Service.

In addition to the risk factors contained in the Base Prospectus, prospective investors should take into account the following additional risk factor associated with Securities linked to Shares traded on the China Connect Service:

The Issuer may issue Securities linked to Shares traded on the China Connect Service. Prospective investors of the Securities should be aware that if an Optional Additional Disruption Event specified in the applicable Final Terms occurs, the Securities linked to Shares traded on the China Connect Service may be subject to adjustment (including, in the case of Share Securities linked to a Basket of Shares, adjustments to the Basket of Shares),

cancellation (in the case of Warrants) or early redemption (in the case of Certificates) or the amount payable on scheduled redemption (in the case of Certificates) may be different from the amount expected to be paid at scheduled redemption.

The Optional Additional Disruption Event relates to the Shares ceasing to be accepted as "China Connect Securities" (as defined in the rules of The Stock Exchange of Hong Kong Limited) for the purpose of the China Connect Service or the suspension or termination of the China Connect Service (each as more fully set out in the Conditions).

Prospective purchasers of the Securities should also be aware that if an issue of Securities includes provisions dealing with the failure to open of the China Connect Service on a date for valuation of an Underlying Reference and the Calculation Agent determines that the failure to open of the China Connect Service has occurred or exists on such valuation date, any consequential postponement of the valuation date, or any alternative provisions for valuation provided in any Securities may have an adverse effect on the value and liquidity of such Securities.

The occurrence of such failure to open of the China Connect Service in relation to any Underlying Reference comprising a basket may also have such an adverse effect on Securities related to such basket. In addition, any such consequential postponement may result in the postponement of the relevant Settlement Date or Redemption Date.
